

PAOLA BORELO

REGISTERED DIETITIAN NUTRITIONIST

Dear Healthcare Provider,

I am writing to introduce myself and offer nutrition counseling services to your patients as a Registered Dietitian Nutritionist (RDN). I focus on family and childhood nutrition education. My areas of expertise include: infant feeding, picky eaters, child weight issues, mealtime struggles, healthy eating, and meal planning. I have been credentialed as a RDN since 2008 and I am licensed to practice in Texas, Utah, Minnesota, and Nevada. I am also completely fluent in Spanish for clients who prefer it.

I offer telehealth consultations through a HIPAA-compliant, secure platform that can be accessed from a cell phone or computer. Virtual consultations are extremely convenient for patients, making it easier for them to keep appointments and have follow up sessions as needed. This helps them improve their eating habits and overall physical well-being.

I am currently out of network and provide a Superbill, which patients can submit to their insurance for possible reimbursement.

I would greatly appreciate any referrals you consider appropriate. I have included a brochure of my services along with business cards. I will gladly send you more, if needed. I am also available to further discuss how I can better meet your patients needs and provide my references.

Best regards,

Paola Borelo, MBA, RDN, LD
